

TECHNOLOGY ENABLED CARE SERVICES

Reference: SBS/16/CR/9035

SUPPORTING PATIENT CARE THROUGH TECHNOLOGY

When does it start?

20th June 2017 to 19th June 2022

Who can take advantage?

NHS and Public Sector organisations, especially Local Authorities

Benefits of using this agreement

MEETING OBJECTIVES

- The framework meets Meeting outcomes within The NHS Outcomes Framework: enhancing the lives of people with long term conditions.
- The framework meets outcomes within The Adult Social Care Outcomes Framework: to ensure people receive care, when it is needed, in the most appropriate setting and in a way that enables them to regain independence.

BETTER END CARE

Contributing to better integrated health and social care

SUPPORTING STAFF

- Supporting new models of primary care
- Supporting reviews of urgent and emergency care
- Supporting a 7 day service

PERSONALISATION

Promotion of personalisation of care

About this Framework Agreement

Lot 1 – Electronic Assistive Technologies

An Electronic Assistive Technology (EAT) service under this lot would provide environmental control systems and alternative means of computer access for persons with complex disabilities or frailties in the community. Products/services also include home appliance controls.

Lot 2 – Alarm Technologies & Services

These products are positioned for remote monitoring of people who require external support (e.g. housing services, social care, and/or health services) to keep living independently or those who support and care for them. Products/services include a combination of alarms and sensors e.g. for Fall Monitoring

Lot 3 – Continuous Monitoring Services

The exchange of data between a patient at home and their clinician(s) to assist in diagnosis and monitoring often used to support patients with long term conditions. This can include Vital Signs or Pressure Sores monitoring.

Lot 4 – Schedule Remote and On Demand Services

Scheduled and on demand remote interactions help people to manage and control chronic illness and sustain independence. They enable the remote exchange of information, primarily between a patient or citizen and a health or care professional (Telehealth/Teleconsultation), to assist in diagnosing or monitoring health status and/or promoting good health.
