

Contract Information

Insourcing of Clinical Support Services

Reference: SBS/18/CW/ZOC/9314

Up to 20% saving against tariff

When does it start?

1st October 2018 to the 30th April 2023.

What does it cover?

This framework aims to support the increasingly popular use of insourcing across the NHS to secure extra clinical capacity to meet increasing demand.

Insourcing is defined as where an NHS organisation subcontracts medical services/procedures. It differs to locum supply in that the full end to end service is provided, not just staff.

The supplier uses the NHS organisation's premises and equipment to deliver these services, however remote consultations are also available. Insourcing is largely focused on secondary care and the services are used out of hours when the premises/equipment is not being used by the NHS thus making efficient use of the services.

The framework covers the following service elements:

- Provision of a multi-disciplinary consultant let service
- Triage and clinical assessment of patients
- Clinically appropriate diagnostics and treatment (excluding surgical interventions beyond day surgery)
- Provision of onward referral or discharge
- Follow up appointments
- Service delivery on site
- Virtual consultations also available

A wide range of specialties are covered.

Who can take advantage?

All NHS and wider public sector organisations across the UK.

Why should I use it?

- **OJEU Compliance**

A detailed procurement exercise has taken place to ensure that suppliers selected are appropriate in terms of meeting all legislative requirements and therefore no formal tendering is required.

- **Reduces waiting times**

Increases capacity to help Trusts hit their 18 week targets.

- **Efficiency savings**

Helps utilise equipment in moments of downtime i.e. evenings and weekends.

- **Ensures patient safety and comfort**

Patients are seen at the Trust premises.

- **Wide coverage**

The procurement offers coverage of services across a wide range of HRG's including endoscopy, ophthalmology and general surgery.

- **Mini Competition & Direct Award**

Opportunity to run a mini competition off the back of the framework agreement, in order to meet the bespoke requirements of each Trust. However customers can also direct award.

- **Gives Trusts more control**

Trust policies and procedures are adhered to.

- **Agile Framework**

The appointed suppliers will be able to bring forward new services throughout the life of the agreement.

- **Implementation Support**

NHS SBS have Category experts on hand to provide implementation support to Trusts as and when required.
