

Medicines Management Prescribing Decision Support Systems 2

SBS/19/AB/WAS/9389

Potential saving opportunities 24%

When does the framework start?

1st October 2019 – 30th September 2023

What is the aim of the framework?

To provide a computerised solution for healthcare professionals which reduces the occurrence of preventable medication errors.

Who can take advantage of the framework?

All NHS and Public Sector Authorities

What are the benefits of using the framework?

DIRECT AWARD

NHS Organisations are able to direct award via this framework agreement.

OJEU AVOIDANCE

A compliant procurement exercise has been undertaken to ensure that suppliers meet all key standards and requirements.

SPECIALIST LED

A rigorous and robust selection process has been led by specialist clinical leads. The evaluation panel comprised of members of the CCG collaborative Medicines Management Team, clinical IT leads & prescribing and pharmaceutical specialists.

SYNCHRONISED

Providers are required to provide a robust support system that fully integrates with TPP SystemOne and EMIS Web, or equivalent.

VALUE FOR MONEY

Secured value for money for the NHS with controlled maximum prices. Additional savings can be made through efficient and more cost effective prescribing.

IMPROVED QUALITY OF OUTPUT

Aims to enhance accuracy, visibility and consistency for healthcare professionals when prescribing, dispensing or administering medication.

Supports medicines optimisation and management teams in reducing the occurrence of preventable medication errors in their CCG.

COST EFFICIENCY

Supports better and more cost-effective prescribing in primary care. The Kings Fund estimates that standardisation of prescribing practices for certain treatments (e.g. low cost statins) could save the NHS more than £200 million per year (2007, NAO).

Detailed Service Offering

- Computerised support to increase the effectiveness, safety and cost effectiveness of prescribing which works well with TPP SystemOne, EMIS Web or equivalent.
- Available as a complete off the shelf package system (COTS) with minimal customisation except for the loading of profiles and associated adjustments.
- Provides clear and concise suggestions of more effective, safer or cost effective medicines early in the process when a prescriber has begun to prescribe a medicine that is deemed likely to be a suboptimal choice, taking into account relevant national guidance.
- Enables prescribers to switch easily to the suggested medicine, at an appropriate dose and frequency if the switch suggestion is accepted.
- Enables efficient management of the profile of switch suggestions and messages displayed, adding and deleting suggestions and messages, deciding whether to switch specific suggestions on or off, and refining the content of messages the system displays to prescribers.
- Allows the switch profile to be updated centrally and remotely for all user practices (i.e. visits to practices not required).
- Generates Reports to include:
 - net savings or increases of prescribing expenditure
 - acceptance and rejection rates for individual switch suggestions and for the aggregated total of switch suggestions
 - rates of prescribing for formulary and non-formulary medicines
 - reasons for prescribers' rejection of individual switch suggestions where recorded
- Incorporates Population Health Management technology into the solution to provide data that will support a contracting authority with identifying and addressing care gaps.
- Training for the use of the available functionality in Medicines Optimisation available for medicines management teams
- Customer support desk
- Any other innovative elements
